

# LOLLIPOP TREES

-COLORING FOR GROWN UPS-

A Gift from  
[MenuPlanningCentral.com](http://MenuPlanningCentral.com)

We all need a little oasis from the busy-ness of life. In recent years I've discovered that taking a little time-out to do some art (no matter how lacking in skill I might be) is quite soul-soothing and restorative. This, I believe, is what the adult coloring movement is about. We're rediscovering a simple pleasure that can bring us joy and balance today.

This little collection of printable coloring pages will help you get started. Share them with the children in your life, or enjoy them all yourself. Just get yourself some nice colored pencils, markers, or crayons, put on a little background music, and begin.

Enjoy!

~Erica Johns
